One of the largest manufacturers of rolled zinc used for roofing, cladding and rainscreen façade applications, VM Zinc offer 5 pre-weathered surface finishes as well as VM Zinc Plus for warm roof/non ventilated zinc applications.

The product range includes zinc sheet and coil, plus various profiles of guttering and complete rainwater systems, prefabricated panels, tiles and scales, as well as decorative zinc and copper accessories.

VM Zinc can also provide initial design assistance, CAD details and NBS specifications (including CAD design for one-off projects), technical assistance and support.
